DESIRE TO SERVE—PLUS ABILITY

L. A. CAMPBELL

LAID TO REST

ROSSLAND, B.C., May 2.—Representatives from all walks of life filed St. Andrew's United church, Rossland, on Friday afternoon when they gathered to pay final respect to Lorne Argyle Campbell, who died Tuesday.

The body lay in state at the church from 10 a.m. Friday morning. The front of the church was banked with a series of beautiful floral tributes.

Rev. T. B. McMillan, B.A., officiated and was assisted by the senior choir under the leadership of Lance Whitaker. L. Freeman presided at the electric organ which was a gift to the church from Mr. Campbell a number of years ago.

Maker of Industry

"Today we pay our last respects to one that was not only a foremost citizen of this community, but a foremost citizen of the Province and of the Dominion and a well known figure in a good many of the States to the south of us," said Mr. McMillan. "But he was more than that in an unusual way. He was the maker of the community in which he lived and one of the makers of the industrial life of the Province."

"On this continent there is a deep and wide spread admiration for the self made man. He is one of our traditions and one of our boasts, but no man is self made. At times he is the product of his natural endowment and training, coupled with the resources and circumstances in which his work was carried on. Mr. Campbell came to Kootenays 45 years ago at a time when the natural resources of the region were already being exploited and when their inter-relationships to one another were just beginning to be realized. His training, a natural gift, enabled him to grasp the present and foresee the future. He and the country reacted on one another and grew into greatness together. Without the opportunities that a new and developing country afforded, he could not have grown nor attained as he did in part, the country and its developing opportunities made him what he was."

"But many in part as the country helped to make him, he helped to make the country. His mind saw big pictures and he had the drive and the capacity of purpose to make his imagination come true. No read was long enough to display his enthusiasm and no climb was strenuous enough to exhaust his energy when the road and the climb led to his goal. His breadth of outlook and energy of accomplishment were widely recognized. When he became a member of the Provincial Legislature these abilities were recognized and he was taken into the cabinet and was appointed in turn Minister of Mines and Minister of Finance, two departments in which he had a wide and active knowledge. The regard other members of affairs had for his ability and character is well illustrated by the numbers of position of trust to which he was voted and which he filled with conspicuous success and energy."

A Good Citizen

"Lorne Campbell's mind was not always on his large matters. He was a good citizen in the community in which he lived for so many years and the City of Rossland and its people had received benefits endless in numbers and varieties not only from his means, but from his thoughtfulness and good sense. Over the years there have been few enterprises undertaken for the welfare of the community that had not his hearty sympathy and the support of both his money and his influence. This help was not given ostentatiously. It was given very quietly and there is good reason to believe that no single individual outside of himself had known of all the

ways in which he did help. He was interested in the children and youth of the city collectively and many of the assemblies that are here exist in no small part because of the interest he had in the younger generation.

"He was interested in many of them individually. Some of them have received help from him of which they know, while it is a good guess that many others have received help indirectly of which they have never known the source. The city and many of the people in it have lost a good and interested friend in Mr. Campbell's passing."

ways in which he did help. He was interested in the children and youth of the city collectively and many of the assemblies that are here exist in no small part because of the interest he had in the younger generation.

"He was interested in many of them individually. Some of them have received help from him of which they know, while it is a good guess that many others have received help indirectly of which they have never known the source. The city and many of the people in it have lost a good and interested friend in Mr. Campbell's passing."

Company Greatest Monument

"But when all has been taken into consideration his most outstanding monument will be found to be the Company which he built up and of which he was President and General Manager. That represented his life work. Many other things he did and did well, putting into them the careful and conscientious effort of a good workman, but in the West Kootenay Power and Light Co. he put more than conscientious endeavor. Into that he put himself as much as is possible when a man works with other men and women. The enterprise was his, it was his chief interest, it was his main preoccupation."

"Its conception was his. With care he nursed it in its infancy. With pride he guided its development and its growth. It is an enterprise in which a man might well take pride and satisfaction. It gave much back to him, because it was the success that he made of his own business that led others to entrust their business to him. It was to be an almost unbreakable rule of life, that we get out of any particular activity in proportion as we put into it. Very largely out of his success in the building of a new company, there came to him very lately a reward that deeply pleased him. He was selected for the seat of Sir John Kennedy Medal, which if his health had allowed, would have been presented to him in person next week."

Coleman Activities

The late Mr. L. A. Campbell was President of the McGillivray Creek Coal & Coke Company since its formation in 1909, with the exception of a few years in the Nineteen-Twenties, when due to pressure of other duties he relinquished the post, and in those years acted as Vice-President.

During the first years of the history of this Company, Mr. Campbell also acted as General Manager, and the early developments of the mine and plant installation came under his personal supervision.

The McGillivray Company was first incorporated in the State of Washington and registered under the Ordinance of the North West Territories governing foreign companies, but in 1917 Mr. Campbell was successful in having the Company dissolved and in obtaining a charter under the Dominion of Canada Companies Act.

He was elected to the presidency of International Coal and Coke Company in 1936, which, at that time, was in the midst of a serious problem brought about by the underground fire late in 1934. The far-sighted policy promptly adopted resulted in an early rehabilitation of the mine and insured a long time future. The rock tunnel plan of development, although not new in the industry is rarely practiced, but the extent to which this plan is used at the International, places that mine in rather unique position.

Development of the coking industry contributed largely to the comparative prosperity of Cole-

man during the years from 1935 onward. When the ovens were operating seven days per week, 90,000 tons of coal per year was being used in the ovens. This alone meant approximately 26,000 man-shifts per year for the mine employees, or in other words, sixty days of mine operation in addition to the work provided for coke oven men. Always aggressive, Mr. Campbell's policy was responsible for both companies being well in front with regard to modern coal preparation. The class of mine buildings and the efficient coal preparation plants at both mines are tributes to his sound policies.

Prior to 1935, the bulk of output was shipped during four or five of the summer months, during which time he had a great influx of transient labor to handle the business, and in the winter months less working time for the permanent residents of Coleman. It was either a feast or a famine, both for the companies and the miners. The changed policy of spreading shipments over equal weekly shipments resulted in steady work for the miners, and assisted the companies in making long term operating economies. The Town quickly changed from a mining "camp" housing a single men during boom periods, to a solid married men's Town, and in the years following Coleman experienced a considerable building boom. The residents could feel the feeling of security that the new policy engendered, and a study of residential sections today as against pre-1935 will conclusively confirm the beneficial results of Mr. Campbell's far-sighted vision.

Mr. Campbell leaves both Companies in as sound a position both physically and financially as any in the industry.

BLAIRMORE CITIZEN

BEREAVED

Friends of Mrs. Maud Clifford heard with surprise and sorrow the sudden passing while visiting Tuesday afternoon at the home of Mrs. W. L. Rippon. Mr. and Mrs. Harry Gardner, the latter's daughter of deceased, were immediately notified and left Tuesday evening by TCA for Victoria.

Mrs. Clifford, Mrs. Rippon, Mrs. George Patterson, all former Colemanites, and two Victoria ladies were members of a bridge club which met once a week. Tuesday afternoon was Mrs. Rippon's turn to entertain. It was during the bridge session that Mrs. Clifford collapsed.

Deceased taught school for some years in northern Alberta and is said to have written articles on the Peace River Country for the archives of Alberta's history. Prior to coming to Coleman around 1924 she and her family came from Victoria where Mrs. Clifford had been a teacher of primary subjects at normal school.

In Coleman she taught Grade 1 and became very well known and liked by the Community generally. She retired from teaching about 5 years ago and went down east on an extended holiday. She returned to the Pass and resided with her daughter for a period and about two years ago went to Victoria to reside.

Surviving are two daughters, Mrs. Gardner of Blairmore, Mrs. McNaughton, of Hamilton, and a son Harry, of Toronto.

MONTH LONG BUYERS

STRIKE IS THREATENED

Mrs. Ben Swank, president of the Edmonton Housewives' League, Sunday night asked more than 400 persons to support a one month buyers' strike.

She said the strike would be carried out by Edmonton women from May 10 to June 10. The first week, she said, "we're not going to buy butter, shortening or lard. The second week we're not going to buy jam, marmalade, chocolate bars. The third week we're not going to buy clothing."

Posters are being distributed throughout the Pass this week calling for the housewives to support this buyers' strike, stating that it is on a nation-wide basis.

FERNIE DRAMATIC CLUB TO APPEAR IN COLEMAN

The Fernie Dramatic Club has been working faithfully for a number of months on Sir James Barrie's "The Admirable Crichton". The play is a delightful comedy concerning the family of Lord Lcam, ship-wrecked on an island where Crichton, the butler, becomes governor and he and Lord's daughter Lady Mary fall in love. The problem of class barriers, their use, misuse and cause is well illustrated. On the tropical island, Crichton, the servant, seems to be the savior of his sole companion. Life on the island, in the rough proves to be highly entertaining. The message of Barrie's not only amusing but enlightening as well.

Shakespeare's "Macbeth" (abridged) a production which was entered in the Creston High School Drama Festival last month was exceptionally high prize from the adjudicator. The tragedy is well produced and acted. It is drama at its best and will precede the presentation of Barrie's play.

Both these dramatic treats will be given in the Coleman Community hall on Friday, May 16, at 8 p.m. The two productions deserve the usual whole-hearted support of all the people in the Pass.

AUTOMOTIVE TRADE ASSOCIATION, C.N.P. ZONE

The operators of the Automotive Trade Association, Crows Nest Pass Zone, at a meeting held on Monday evening, May 5, 1947, decided that during the tourist season which terminates at the end of September, they would put a system into effect in the Pass whereby there would be one garage or service station open for a week at a time in the evenings and on Sundays preceding in order to take care of the tourist trade and people in the Pass. Each garage and service station will take turns, the garage or service station which shall be open for their week shall be open on Sundays from 8 a.m. until 7 p.m. and each night during the week until 10 o'clock. This shall continue for the summer months when they shall revert back to their old system of closing early.

Customers are urged not to patronize those service stations or garages, who do not stand by the garage association rulings as the operators and employees now belong to a union which is 90% strong.

Garages in the Pass in the association, to inaugurate this policy of one garage or service station in each town open to serve the public on Sundays and evenings of the following week, have allocated the following: In Blairmore, Satoris Motors (Texaco); Coleman, Ding & Lew; Bellevue, Les Green. In Frank and Hillcrest, the and evenings of the following week. This schedule will be in effect Sunday, May 11th to May 17.

APPLICATIONS WANTED

Applications are invited for the position of Secretary-Treasurer for the Blairmore Legion Club. Applications must be filed on or before May 10, 1947.

CHANGE OF OFFICE HOURS

Effective Monday next, May 12, the local National Employment office will be open during the following hours: Monday to Friday inclusive from 9 a.m. to 4 p.m., Saturdays 9 a.m. to 1 p.m. The office remains open during the noon hour.

22ND ARMoured BRIGADE WORKSHOP, R.C.E.M.E.

After numerous delays part of the equipment for the Reserve Army Unit located in the Crow's Nest Pass has now arrived and is located at the Armoury in the West End of Blairmore. During the winter months, as the public is aware, the work of erecting the tents for temporary use by this Unit has been carried out and while the accommodation is limited it is sufficient for present training purposes. Ten of the 17 vehicles which will ultimately belong to the unit are now on hand and training during the coming months of officers and NCO's will be proceeded with. As can be readily understood it is necessary, in order to have an efficient Unit, for the key personnel to have a thorough knowledge of the equipment before it will be possible to undertake an active Recruiting campaign. At the present time it is anticipated that this preliminary training will be completed during the next two or three months after which the unit will be open for recruits.

HEAVY PENALTIES FOR ARMED ROBBERIES

Turning to serious crime for the first time in their youthful lives is going to cost three young Calgary men their freedom for the next two and a half years. The three appeared before District Court Judge J. H. Sissons at Macleod last Friday.

Pleading guilty to charges of staging two armed robberies which netted them \$80 at Blairmore and \$31 in Lethbridge during the early hours of February 27 last, Leland Madison, Neil Billingsley and Robert Graham drew two years and six months in Prince Albert penitentiary on each count, the sentences to run concurrently.

The 19 admitted robbing Edna Wilson at Blairmore and Mrs. Vera Degnand as they pleaded guilty before District Court Judge J. H. Sissons and drew the penitentiary terms, first at Macleod for the Blairmore crime and then Lethbridge on their latter count.

The armed robberies were the first offences for Madison and Graham aged 21 and 26 years, respectively, while the only offence previously committed by Billingsley was obstructing a peace officer.

LEADING EXPORTS ARE TABULATED

Nine out of ten principal commodities which Canada sold abroad last year were the products of the Dominion's farms, forests, mines, and fisheries.

These ten items together made up more than one-half of the country's 1946 exports which had a total value of \$2,221,000,000.

The ten most important commodities which Canadians sold to foreign countries last year were: newspapers; wheat; wheat flour; planks and boards; wood pulp; fish; automobiles; trucks and parts; bacon and ham; aluminum; and nickel.

Canada's Foreign Trade

FOREIGN TRADE IS AN IMPORTANT ELEMENT in the economic structure of any nation and it is closely connected with the progress and prosperity of the people. The story of Canada's foreign trade since 1939 has been an encouraging one. Before the outbreak of war in 1939, the Dominion's external commodity trade was estimated at \$1,500,000,000. From that time on it rose steadily until in the years 1944 and 1945 it exceeded \$3,000,000,000, Canadian exports at that time included large shipments of war materials. In 1946, when there were no longer required abroad, the volume of trade dropped to \$1,000,000,000, which still shows a very substantial increase over the pre-war figures.

Has Surpluses To Sell Abroad

While the population remains at the present level, Canada will always have surpluses, including products of her farms, forests and fisheries for export to foreign countries, and we know only too well that our prosperity depends to a large extent on the demands which other countries make for these goods which we have to sell. Since 1939 Canadian export trade has increased from a total of \$800,000,000 in 1939 to \$2,300,000,000 in the first post-war year, 1946. The peak was reached in 1944 and 1945, when shipments of war materials and other goods to foreign countries amounted to \$3,500,000,000. Imports have also advanced steadily, but less spectacularly, having increased from \$65,000,000 in 1939 to nearly \$2,000,000,000 in 1946.

Much Progress Has Been Made

The general rise in Canada's foreign trade, in respect to both imports and exports, is an indication that phenomenal progress has been made since the pre-war years. Comparison of the volume of trade in 1939, the last year before the war, with the volume in 1946, the first post-war year, reveals an increase of some \$2,500,000,000. Experts are of the opinion that the figure for 1947 will likely be higher than that for 1946. Newspaper, wheat and wheat flour headed the list of Canadian exports for 1946, and Great Britain, the United States and France were our highest customers. However, a notable increase was made in shipments to Latin America, twenty countries there having purchased agricultural products and manufactured goods from us last year. Much of the growth of Canada's export trade has been due to the war and to the great need in Europe for food and materials for rehabilitation. However, officials are of the opinion that there is no immediate prospect of a recession in foreign trade, and it is to be hoped that we may be able to retain the present volume, which has such an important effect on the progress and prosperity of this country.

USE SPRAY GUN TO DISINFECT CATTLE

RENFREW, Ont.—Making its first appearance to Eastern Ontario farmers, a power spray gun began disinfecting 7,000 head of Bromleydownship cattle of warble and heel flies recently.

F. Q. Dench, county agricultural representative, said 75 farmers have combined to fight the injurious effects from the flies that yearly infest their herds. The spraying area extends from the Bonaventure river to Snake river and the whole operation will be completed in one week, he added.

The sprayer, the latest in agricultural development over the common hand rubbing method to combat infestation, is connected by a 200-foot hose to a gasoline-powered engine and spray tank, mounted on a converted army truck. Spray ingredients used are rotenone and wettable sulphur. The fee charged to each farmer is 20 cents per head of cattle.

Mr. Dench is anxious to see the machine in county-wide operation. He stated that the sprayer may be obtained by communicating with the county agricultural office.

GERMOLINE IS SO GOOD FOR RASHES! PIMPLES! IRRITATIONS!

Germoline is famous for nothing so helpful as relieving itching, rashes, eruptions, pimples, too. Try it! See why such a great favorite. Buy GERMOLINE today.

Germoline Ointment

RICH, SPICY CINNAMON BUNS

Recipe

Dissolve 1 tsp. sugar in $\frac{1}{2}$ c. lukewarm water; add 1 envelope Royal Fast Rising Dry Yeast. Let mixture stand 10 min. Then stir well. Scald $\frac{1}{2}$ c. milk; add 3 tbs. shortening, $\frac{1}{2}$ c. sugar, $\frac{1}{2}$ tsp. salt; cool to lukewarm. Add 1 c. sifted flour to make a batter. Add yeast mixture and 1 beaten egg; beat well. Add $2\frac{1}{2}$ c. sifted flour, or enough to make a soft dough. Knead lightly, place in greased bowl; cover; set in warm place, free from draft. Let rise until doubled in bulk, about 2 hours. When light punch dough down; roll out into oblong piece, about $\frac{3}{4}$ " thick. Brush with 3 tbs. melted shortening or butter. Sprinkle with $\frac{1}{2}$ c. brown sugar, $1\frac{1}{2}$ tsp. cinnamon, $\frac{1}{2}$ c. raisins. Roll up lengthwise in a tight roll; cut in $1\frac{1}{2}$ " slices. Place cut-side up, $1\frac{1}{2}$ " apart in greased shallow baking pan. Cover; let rise in warm place until light, about 1 hour. Bake in 425°F. oven about 20 minutes.

MOSCOW GUARD CHANGES — Many major problems were left unsolved when the foreign ministers' conference closed in Moscow recently. Here is the ceremonial changing of guard.

FUNNY And OTHERWISE

They were walking arm and arm. "Darling," she said coyly, "which do you like better, a homely woman with great intelligence or a pretty girl without brains?" "Honestly, sweet," he replied, "I prefer you to either."

The six-year-old heir apparent returned home dejectedly from his first day at school.

"Ain't goin' to that ole school tomorrow," he muttered.

"Ain't why not?" asked his mother.

"Well," the youngster replied, "I can't read and I can't write, and they won't let me talk—so what's the use?"

The conceited young man was even more boring than usual.

"It's a fact," he said with pride, "that people often take me for a member of the Guards."

His pretty companion, wasn't impressed.

"Really," she drawled, "Shin—railway—mud—or black?"

"My father has influenza all the time."

"Doesn't he know that whisky is good for influenza?"

"Yes, that's why he has it all the time."

A Welshman who was very proud of his bass voice was describing a wonderful dream he'd had.

"I was in a mighty choir," he said, "5,000 sopranos, 5,000 altos, 5,000 tenors—all singing together double forte."

"It must have been wonderful," said the listener. "But what about the basses?"

"That was it," said the dreamer. Suddenly the conductor stopped the choir and, turning to me, said: "Not quite so loud in the bass, please, Mr. Jones!"

The shepherd's daughter was going to marry a town-dweller. Wishing to make her father look smart at the ceremony, she got him to agree to wear a hat. The shepherd went into a store.

Clerk: "What size, please?" Shepherd: "I don't know."

Clerk: "We'll try a six and a half first."

Shepherd: "Six and a half be hanged. I wear a 16 collar, and I know my head is bigger than my neck."

Farmer: "Let me tell you, my friend, that horse knows as much as I do."

Friend: "Well, don't tell anybody else; you might want to sell him some day."

The Kansas City Star got in trouble a short time ago through switching headlines. On the same day the highly respected wife of the Kansas City mayor passed away, and the city's oldest and ugliest ice house burned. Unfortunately the heading over the passing of the good lady read "Another Eyesore Gone."

"Johnson is so cancelled," "Yes, on his last birthday he sent a telegram of congratulations to his mother!"

"Pilots can do anything a bird can do nowadays," boasted the astounded young man.

"There's one thing; they can't do like a bird," said his friend.

"Oh, and what's that?" "Sing sweetly while sitting on a barbed-wire fence."

Schoolboy Bowls 450 Score While Playing Hooky

TORONTO.—A Toronto schoolboy of 13 bowled himself into trouble recently. If he hadn't gone out and rolled 17 consecutive strikes for a perfect score of 450 in a five-pin game with a chum, his mother probably would never have known he played hooky from school.

His sin found him out when the manager of the bowling alley phoned the boy's home to get his age.

"That's how I found out he wasn't at school," said his mother.

The boy, William Mills, has an average of 225 in the suburban East York Men's League in which he bowls and his best previous string of strikes was seven or eight in a row.

Toronto bowling authorities said they believe he is the youngest bowler in Canada to get a perfect five-pin score.

Prince Rupert To Have Great Industry

The Vancouver Province says: Prince Rupert, which was described in the Legislature as a "neglected city," is to have a great industry.

The Provincial Government has persuaded the Celanese Corporation of America to establish a plant on Watson Island, eight miles from the city, and to spend \$15,000,000 on buildings and equipment. Approximately 1,000 men will be employed in the woods and the mill.

An interesting feature of the bargain is the corporation's undertaking to maintain the forest area allotted to it in perpetuity.

British Policy Is Praised By Smuts

Jan Christian Smuts, Prime Minister of the Union of South Africa, commenting on British policy, said: "A profound change has come in recent years over British policy—a change still little understood in the world at large. Some people still speak of British imperialism as a baneful factor to be combatted. The fact is, it is no more. It departed this life more than a generation ago, such as it was its heyday was in the nineteenth century, especially in the great days of the Victorian era. In the Boer War, it probably played its last hand. In that war and the peace which followed the crust of imperialism was broken and the deeper forces of the real British spirit once more emerged to the surface. The story of that miracle of peace making is writ large in the history of the new South Africa, and has become part of the history of the world. The commonwealth of nations has arisen, and the new pattern is spreading through the whole British Empire; both at home and abroad wherever the British flag flies, there is a new spirit of liberation, a new outlook which inspires the whole vast group of mankind."

Ceres was the Roman goddess of agriculture.

NECESSARY TO FILL OUT FORM TO GET U.S. MONEY

OTTAWA.—The Foreign Exchange Control Board said Canadians drawing any United States money from Canadian banks now had to fill out a form.

Previously a Canadian going to the U.S. on a visit could draw up to \$100 in U.S. currency without any formalities. Any additional "reasonable amount" could be obtained by getting a permit from a bank.

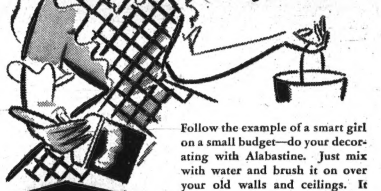

The board said the new step had been taken because it had been found that some persons were going from bank to bank, drawing up to \$100 from each so that their final total was well beyond the \$100 limit.

SHIP DESIGNED TO MEET EMERGENCIES

The Cunard White Star liner Queen Elizabeth, actually a "ship within a ship," has two bottoms—an inner and outer—with an intervening space of nearly six feet divided into numerous watertight compartments. This construction was devised as precaution against just such mishaps as her recent grounding near Southampton.

Peanuts were known as far back as 950 B.C.

Sue Beautifies Drab Living Room Walls

Follow the example of a smart girl on a small budget—do your decorating with Alabastine. Just mix with water and brush it on over your old walls and ceilings. It dries quickly with no unpleasant odour. Will not rub off. Comes in ivory, cream, buff, light buff, pink, light blue, grey, light green, white.

ALABASTINE WATER PAINT 75¢ A FIVE-POUND PACKAGE

WHEN HOUSEWORK GETS TOO MUCH FOR YOU...

THE FARM IMPROVEMENT LOANS ACT

During 1946, 14,000 farmers obtained loans totalling nearly \$10,000,000 under the Farm Improvement Loans Act. A report outlining the first full year's operation of this Act was tabled in Parliament by the Minister of Finance, Honorable Douglas Abbott.

Loans are made through the 3,100 branches of the chartered banks for the improvement and development of farms and for the improvement of living conditions on farms. The interest rate is 5 per cent simple interest per annum, and loans may be made for periods up to ten years. The legislation aims at assisting particularly the average farmer who in the past has not always been able to obtain bank credit for farm improvement purposes.

Farm implements and farm trucks account for \$7,488,347 of loans made during 1946. These loans represent an actual sales volume of approximately \$12,500,000. From information available it is reasonable to assume that practically all farm implement sales in Canada requiring financing are now being financed either through loans obtainable under the Farm Improvement Loans Act or through regular bank loans. The result should be a substantial saving to the farmer, not only in the purchase price of his farm but also in finance charges and interest rates previously prevailing for this type of financing.

Included in the total are loans to 1,008 farmers to clear and break an estimated 50,000 acres of new land mostly in the pioneer sections of Western Canada. Loans for foundation and breeding stock accounted for 403 loans totalling \$190,297.

One of the most important classes of loans is that for the construction, alteration and repair of farm buildings including farm dwellings and separate homes for farm help. As the supply of material and labor becomes more adequate, it is expected that loans for these purposes will be greatly expanded.

As shown in the following table, the Act has been particularly successful in the three Prairie Provinces, Manitoba, Saskatchewan and Alberta:

	No.	Amount
Alberta	4,798	\$3,388,115
Sask.	4,075	\$3,140,157
Manitoba	1,928	\$1,397,539
Ontario	1,443	\$1,369,371
B.C.	467	\$43,706
Quebec	193	\$146,639
Nova Scotia	76	\$5,617
New Brunswick	42	\$4,541
P. E. I.	8	\$4,880

Total 15,050 \$9,580,565

Americans, one writer says, have so many auto accidents because just the sense of power eight cylinders gives 'em is intoxicating all by itself. Maybe so, maybe so. But we still recommend what you buy at the nice and pump without that alcohol blend.

HILLCREST HAPPENINGS

Mrs. E. Gordon and daughter Emma were visitors in Lethbridge last week.

Mr. and Mrs. Bob Welsh are rejoicing over the birth of a daughter at Perry's Maternity Home, Blairmore. Mrs. Welsh is the former Mrs. Dorothy Pitt of Blairmore.

Mrs. Angus Grant and son John are visitors with Mrs. Grant's sister and brother-in-law, Mr. and Mrs. Eddie Biggan at Calgary for these weeks.

Mr. and Mrs. Ferguson Grant are visiting Ferguson's family here. Ferguson has just completed a University course.

Mr. and Mrs. W. Webster and Lillian returned Monday night from Mountain View, where they had been called owing to the critical illness of Mr. Webster's mother, Mrs. Webster. Mr. Webster's mother, Mrs. Webster, passed away on May 1st. Funeral services were held in Mountain View on Sunday. Hillcrest people attending the funeral were Mrs. Joe Atkinson, Mrs. P. McNeil and her son Hugh and Mrs. D. Jones.

Mr. and Mrs. Coover and children, of Coleman, were visitors here on Sunday with Mrs. Coover's parents, Mr. and Mrs. J. Dudley.

Mr. and Mrs. E. O. Duke were week end visitors with their son and daughter-in-law, Mr. and Mrs. Horace Duke, of Fernie. Ralph Boehmer, of Blairmore, spent the week end here with his uncle and aunt, Mr. and Mrs. Earl Boehmer.

Might is not right, yet one is always right if one is strong enough and always wrong if one is weak.

President of A.I.C.

J. F. Booth, Ph.D., of Ottawa, Associate Director, Marketing Service, Dominion Department of Agriculture, who has been elected president of the Agricultural Institute of Canada, was brought up on a farm in Manitoba and Saskatchewan, and graduated from the University of Saskatchewan in 1910. After serving as Agricultural Representative in Saskatchewan for a period he was appointed in 1921 Commissioner of the co-operation and Markets Branch for that province. A few years later he took post graduate work at Cornell University, N.Y., and subsequently became senior consultant in the Bureau of Agricultural Economics, United States Department of Agriculture.

BRIDGE DOWN—SCOUTS ACT!

Ensign Troop in Alberta discovered a bridge caved in by Spring floods. They immediately took action to stop all traffic to the bridge. Two Scouts stayed behind to act as guards while others took the information to Municipal authorities, and on their own, made signs warning traffic not to use the bridge.

COWLEY HAPPENINGS

Mrs. Eddie Smyth entertained the Ladies Aid of the United Church at their monthly meeting at her home on Wednesday afternoon of this week. Mrs. Helen Swary returned home on Wednesday following a month's visit spent with her daughter, Mrs. Norman Harnish, and family at Delwin.

Kenneth Martin accompanied his daughters Dale and Rae and son-Clair of Spring Coles were week end guests visiting friends here.

George Baker, veteran of the first World War is now a patient in the Belcher hospital, Calgary.

Mr. and Mrs. R. J. Day, who have lived on their farm in the Tennessee district for some thirty odd years, have retired and have moved into the Robert Littleton house, located in the east end of town which they purchased a short while ago.

Seeding is general here this week the weatherman having favored us with good weather for several days now, hoping until the seeding is all done.

A tournament of softball, sponsored by the Cowley Athletic Society will be played off on the Recreation Grounds here on Victoria Day, May 24.

D. R. McIvor was renewing acquaintance here the early part of this week. Mr. McIvor operated a general store here in early days, changing his location to Stettler where he continued in the Merchandise business until a year ago when he retired from active business and now he is making his home at his boyhood farm home, at Lyons Head, Ontario, living with two aged spinster sisters.

Mr. McIvor is 72 and is the youngest of a family of thirteen children, some of whom are now around 90 years of age.

A NEW LONDON IS BEING BORN

Three great reconstruction schemes from which 3 new London will emerge were discussed and adopted recently by the London County Council. These constitute the first steps towards full implementation of the County of London Plan—prepared by Sir Patrick Abercrombie, Britain's noted town planning expert, the object of the Plan is to co-ordinate all building and development projects into an architectural unity which will ensure that the regeneration of London's bomb-shattered areas shall take a pleasing and dignified shape worthy of the world's largest capital city. The first project is construction of a river wall between Westminster and Waterloo Bridges as a prelude to the development and planning of the South Bank of the Thames. The second project calls for the development of some 49 acres at Elephant and Castle at a cost of \$4,000,000 in order to speed the flow of traffic at one of London's most congested points. Another of London's busiest road junctions is also being replanned and this

is catered for by the third project which proposes a half-mile-long viaduct at Hammar Smith.

MOTOR TOBOGGANS GOING TO FAR NORTH

Motor toboggans, which have a normal speed of 31 mph and travel approximately 25 miles on a gallon of gasoline, are now being manufactured in Canada.

Designed to haul heavy loads and to operate efficiently on any kind of snow, a number of these new types of toboggans have already been purchased by the RCMP for use in Canada's far north.

Export possibilities are now being studied by a Canadian manufacturer who hopes to develop foreign markets particularly in Sweden, France and Norway.

IT'S A MENACE TO OUR FORESTS

Most people think of forest fires as causing a destruction of trees alone. Even that would be reason enough for all-out prevention. But forest fires result in far more devastation than ruined timber stands. They destroy wild life and farms, sawmills and homes. They leave the earth barren, unfit for tillage.

They expose the soil to erosion, allow spring floods, and summer dryness. All of us suffer when a forest fire strikes. All of us lose an irreplaceable portion of our heritage. Since any of us can cause fires, it is up to all of us to see that no one does! Resolve to keep the forests green. Be careful with fire yourself—see that your neighbor is careful.

Travel Will Be Fun Again via Canadian Pacific

Remember how pleasant it used to be to travel on Canadian Pacific ships! Remember the cuisine, the courteous service, the fun of shipboard life...and the ships themselves!

Just now there's a big job to do repairing the wear and tear of wartime years—replacing lost ships...but, when it's done, travel will be fun again—the Canadian Pacific way! Soon a new, two ocean fleet will plow the sea routes of the world...and once again it will be possible to go from Shanghai to Southampton—Canadian Pacific all the way!

Canadian Pacific

SPANS THE WORLD

FEW ACQUIRE ART OF LETTER WRITING

The craft of writing can be taught. Through practice and criticism young people of ordinary intelligence can acquire the technique of clear and orderly statements just as certainly as they can be taught to read and to multiply.

Training in writing will not make every boy and girl a literary artist or anything remotely resembling one, but it will produce competent craftsmen. Most college graduates, to judge from their letters, are not competent writers, not because they're deficient in intelligence but because their training has been neglected. They have had too little criticism of their writing and the standard of accomplishment in the courses they have taken has been set far too low.

WORLD HAPPENINGS BRIEFLY TOLD

Industrial building contracts in Canada increased by 83 per cent. during the last two years amounting to over \$183,000,000 in 1946.

Unexploded bombs and exposed ammunition still place out of bounds in Britain 230,000 acres of land, War Secretary F. J. Belenger told the commons.

Gen. MacArthur issued a formal statement declaring Japanese national elections showed the people "have firmly and decisively rejected Communist leadership."

The Emperor Haile Selassie of Ethiopia has asked the Australian government to supply with 180 chargers to mount the Imperial bodyguard at Addis Ababa.

The Scottish Council for development and industry has made representation for appointment of a Scottish Airfield Board to plan expansion of airfields.

French miners agreed to reduce their annual holidays from 18 to 12 days this year to prevent a drop in coal production during the holiday period.

An official order to fell a centuries-old chestnut tree which stands at a busy intersection in Bexley Heath, England, was cancelled after protests from townspeople.

Lyman J. Clark has received a note which he wrote, put into a bottle and cast into the sea off the Massachusetts coast nine years ago. It was mailed to him by a man who found it on the shore at Long Beach, Cal.

Ecuador is so named because it lies directly on the equator.

GREEK PRINCESS WEDS BRITON—Princess Katherine of Greece, 34, seen here, youngest sister of King Paul, is being married to Major Richard Brandram, 35, of the British Army in the royal palace at Athens, with King Paul as best man.

GARDEN NOTES

Warm Weather Planting.

There are certain plants that will not thrive until weather and soil really turn warm and there is no danger of frost. These are things like gladioli, dahlias and other soft, tender stemmed flowers, and corn, tomatoes, melons, squash, cucumbers, etc., among the vegetables. There is nothing to be gained by setting out or planting these until the weather is warm, also the soil. Frost will kill most of them or injure them so badly that they will take weeks to recover.

Where space is limited melons and squash, etc., can be grown along the row of corn or at the edge of the garden where they will trail over the fence, path or perhaps the plot of the next-door neighbour. For melons, however, cucumbers, squash and melons should be planted in specially prepared hills.

Hills are simply loose soil built up in mounds 2 or 3 feet across and about 6 inches high. Into these should be worked some well-rotted manure or black mulch. This keeps the soil open so that the soft, fibrous roots can penetrate easily and the darkish color of the mulch or well-rotted manure absorbs the heat of the sun which these plants love.

Plant about five seeds to a hill. Later thin to about three plants to each group. Keep weeds cleared away, watch out for bugs, and to encourage early fruiting nip off end of vines when half a dozen melons or a dozen or so squash or cucumbers are on the way.

Keep Tools Sharp
Good sharp tools will save a lot of hard work. A dull spade or hoe never do the work efficiently. A few of the special tools, too, will prove helpful—things like Dutch hoes, hand cultivators and long-handled spades to get out weeds. Under the general heading of labor savers will be weed killers like the new 2-4-4 or dusters of the DDT insect sprays or dusters.

Tender Vegetables
The real secret of tender, crisp vegetables is quick, unchecked growth. Beets, carrots, beans, celery and similar things without stringiness or toughness come from gardens where growth has been hurried along, unchecked by weeds or other neglect. By keeping the soil well cultivated quick growth can be developed almost regardless of dry weather. Thin those vegetables which need space for proper, even and speedy development. Harvest them when they are the right size for eating and before they start to harden and mature.

HEALTH NECESSITY IS PROPER SLEEP

Shakespeare must have had a good night's rest when he wrote: "Sleep that knits up the ravelled sieve of care."

Doctors confirm the immortal bard's observation... for sleep is vital to health. It restores energy, rears the muscles and eyes, and tones the blood vessels.

Some people seem to get along with as little as five or six hours' sleep a night... but most of us feel better after a sleep of eight hours' duration. If you have a feeling of always being tired, it may not be due to lack of sleep. The family doctor should be consulted as something may be wrong with your health.

Try to relax first—then sleep will usually follow. You might like to try these rules.

1. Start taking it easy half an hour before retiring. (Play some game, plan an excursion for the weekend, write a letter to a friend. Take a hot drink—hot milk or cocoa, for example.)
2. If you like to read in bed, choose non-fiction or a "hard" book. Something that will bore you to sleep.
3. Rest your mind by thinking of pleasant things—some happy incident during the day—some enjoyable incident of your childhood—anything to make your mind calm and serene.
4. To quieten the body, get rid of heavy pressure. (Lighten weight of covers and clothes if they are oppressive.)
5. Take a tepid bath without a rub-down. As the body becomes warmed in bed it becomes more and more comfortable. If during the night one becomes restless, throw back the covers until body becomes slightly cooled. Then when the covers are pulled up again, the body once more sinks into contentment.
6. Relax the muscles completely.
7. Be sure your sleeping room is ventilated properly.

MAKING NEW HOMES

About 1,000 Soviet families are now settling in the new Soviet province of Kainburg (formerly Koenigsberg in East Prussia) and are establishing collective farms with state aid over an area of 140,000 acres.

When your BACK ACHES...

Backache is often caused by lazy kidney action. When kidneys get out of order excess acids and poisons remain in the system. Then backache, headache, rheumatic pain, disturbed rest or that "fired up" feeling may soon follow. To help keep your kidneys working properly—use Dodd's Kidney Pills. Time-tested, powder, safe, non-habit-forming. Demand Dodd's Kidney Pills, in the blue box with the red head. Sold everywhere. 135

IN POSTAL SHIFT—A. M. Gibson, shown here, district director of postal services in charge of the Toronto area since 1934, has been appointed regional director for Ontario, the post-office department in Ottawa announces. He has been with the post-office for 41 years.

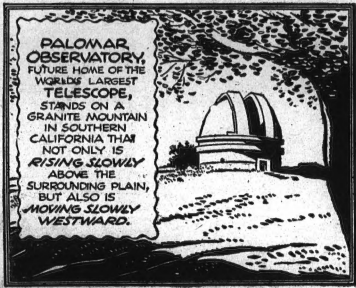

NEEDED FOR BOTH

The chief constable of a small town was also an expert veterinary surgeon. One night the telephone rang. The chief constable's wife answered. "Is that Mr. Jenkins?" asked an agitated voice.

"Do you want my husband in his capacity as veterinary surgeon or as chief constable?"

"Both, madam," came the reply. "We can't get our new bulldog to open his mouth and there's a burglar in it."

THIS CURIOUS WORLD By WILLIAM FERGUSON

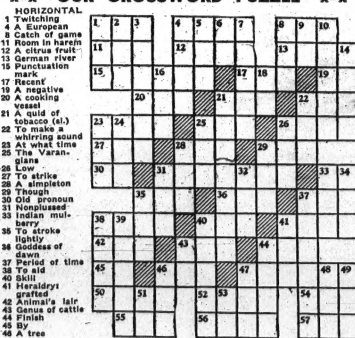

SO LITTLE TIME, SO LITTLE SUGAR—Company's coming, there's nothing for dessert, and the bakery's closed or all sold out—there you have a perfect embarrassing moment! It needn't be one, though, if you get busy whipping up this Ginger Flake Cake that takes only a half hour to bake. The ingredients are the staple kind that you're sure to have in stock.

Ginger Flake Cake

- | | |
|--------------------|-----------------------|
| 1/2 cup shortening | 1 cup sifted flour |
| 1/2 cup sugar | 1/2 teaspoon soda |
| 1 egg | 1/2 teaspoon ginger |
| 1/2 cup molasses | 1/2 teaspoon cinnamon |
| 2 cups corn flakes | 1/2 teaspoon cloves |

Blend shortening and sugar thoroughly. Add egg and molasses; beat well. Stir in corn flakes which have been crushed into fine crumbs and sifted dry ingredients. Add water and beat until smooth. Pour into greased baking pan and bake in moderate oven (350 deg. F.) 30 to 35 minutes. Yield: 9 servings (8x8-inch pan).

LITTLE REGGIE

THE LAWN IN FRONT OF THE CHURCH USED TO LOOK SO LOVELY!

PEGGY

THE TILLERS

WHY CLOTH WAS NAMED WORSTED

According to the Wall Street Journal spelling the difference between high or low production, the distinction between worsted and woolen cloth never has been so important. "Worsted" is the name given a hard-finish cloth by William the Conqueror in 1066 when he observed the Britons making it. He had just worried the Britons, so whimsically he called the cloth "worsted".

Worsted cloth is made from longer length and combed woolen fibres, twisted into yarn, and then woven into a smooth, hard cloth such as serge. It is durable, keeps its shape well, and is especially popular for men's suits.

Woolen cloth, on the other hand, is made of shorter wool fibres—often of those fibres not suitable for worsted yarns. Woven into tweeds, shirtings and flannels, it has a soft, fleecy look. Woolens often make a nice appearance, but aren't as durable and don't retain their press as well as worsted.

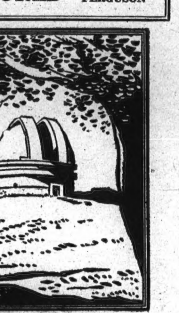

It took 13 years to build Brooklyn Bridge.

GIRLS ENTERING WOMANHOOD...

This fine medicine is very effective to relieve pain, nervous distress and weak, "dragged out" restless feelings, of "certain days" when due to functional monthly disturbances. Worth trying!

By WILLIAM FERGUSON

OUR COMPLETE SHORT STORY—

CENTURY OF PROGRESS

By M. J. COLLINS

DAD and I were thinking out turns in the turnip patch near the line fence between Old Man Murphy's place and ours.

"Now I wonder what's up?" Dad said with surprise as he leaned on his hoe and looked across the field towards the Murphy place. Two cars were driving up the Murphy's lane. Of course this was a long time ago so you know what the cars were like—high touring cars, model T Fords.

We went on with our hoeing and after a while one of the cars drove away. Shortly after that Old Man Murphy hurried across the fields towards us.

"Bought me a car, Tom," he said, clambering over the rail fence.

"A car?" Dad exclaimed, as if he'd never even noticed them driving up the lane. "What do you want with

one of those things? You don't know the first thing about them."

"Nobbut to it," George Murphy said boastfully. "This is the century of progress, us farmers got to keep up with it."

"Sounds like the salesman was stringing you," Dad said dryly. "What else did he tell you?"

"Got her all writ down," Old Man Murphy concluded enthusiastically. "All I got to do is follow what it says. Can't make a mistake driving it. C'mon over and see it," he invited.

"I think I will," Dad accepted, throwing his hoe down between the ridges. "Let's go, Rick, maybe we'll get around to buying one some day."

"What did you pay for it, George?" he asked as we headed towards the Murphy place.

"Well—she cost a pretty penny, yessir, a pretty penny! But don't think she's not worth it. Seven hundred dollars, every cent of it."

The youngest Murphy girl was out sort of fondling the car and cooling over it, at least that's the nearest way to describe it, when we arrived.

"Angosh, it's high!" Dad looked at it with misgiving. "I'd be afraid the wind would blow it over."

"I got in the front seat to have a good look at things but Maggie Murphy gave me such dirty looks that I got out again."

"Let's see," Old Man Murphy had dug a sheet of paper out of his pocket.

"You push in this, pull out that, advance the spark and gas—what does advance mean, Tom?"

"Pull them down," Dad answered. "Step on this—and that's all there is to it. Want to go for a ride?" he offered.

"I'm going out in the hay field and drive around to get the hang of it."

Dad shook his head. "Go ahead, said but he made no move to go and get the horses. "Take a brave man to handle one of them."

Old George swelled up at that. "Yes, sir. A Brave man."

"But I wouldn't be surprised if it cut about twenty years off a man's life," Dad added slyly. That made Old George clutch at his heart and Maggie did a little more flitting.

"Want to buy it, Tom? It's in your turnip patch," Old Man Murphy suddenly suggested.

Father shook his head. "I haven't got the nerve to drive it, George."

"I'm an old man, Tom," George pleaded and right there as far as he was concerned the century of progress slipped into reverse.

With just the right shade of reluctance Father let George talk him into buying the car. I didn't say a word. I knew what Dad was up to. He finally said he'd buy it and get it for three hundred dollars less than Murphy had paid for it.

As we headed back towards our turnip patch Dad was pleased with himself. "Never know what'll happen when you're hoeing turnips, eh son?"

(Copyright Wheeler Newspaper Syndicate)

SAVED BY DOGS FROM BEAR'S FANGS—But for the timely assistance of his two faithful dogs, Joe Joice of Calais, Alta., might have been killed by a wounded and enraged bear. Joice was out hunting in the bush country around his home recently when the dogs suddenly discovered a bear in his den, apparently just awakened from his winter nap. Joice shot the bear four times but couldn't find time to get in a fatal shot. The enraged animal jumped out of his den and headed straight for Joice. Unable to reload in a hurry, Joice started to run. But he was wearing snowshoes and tripped. In a flash the bear was upon him, biting the man's right leg, his left thigh, his left arm and mauling him badly. Joice screamed and the dogs rushed to the rescue, sinking their teeth into the bear's hind legs. The bear let go his victim, jumped over him and ran off with the dogs in pursuit. Although bleeding freely, Joice managed to make his way about a mile and a half to the camp of a friend.

Dad came back helping Old George. He looked more than a little pale around the gills. He kept clutching at his chest and moaning. "Oh, my heart! Oh, my heart!"

We got him into the house, he had aged ten years. Maggie flitted away and got his favorite medicine—a small glass—that helped his heart.

"How'd you feel now, George?" Dad asked.

"I'm a mite better now," he said cautiously. "That—that deathtrap!"

He shook his fist in the direction of the car. "Hitch up the team, Tom, we'll haul it up on the threatening floor, I'm through with that—"

He called the Ford several names and the name car certainly wasn't mentioned once.

"It's sure some contraption," Dad said but he made no move to go and get the horses. "Take a brave man to handle one of them."

Old George swelled up at that. "Yes, sir. A Brave man."

"But I wouldn't be surprised if it cut about twenty years off a man's life," Dad added slyly. That made Old George clutch at his heart and Maggie did a little more flitting.

"Want to buy it, Tom? It's in your turnip patch," Old Man Murphy suddenly suggested.

Father shook his head. "I haven't got the nerve to drive it, George."

"I'm an old man, Tom," George pleaded and right there as far as he was concerned the century of progress slipped into reverse.

With just the right shade of reluctance Father let George talk him into buying the car. I didn't say a word. I knew what Dad was up to. He finally said he'd buy it and get it for three hundred dollars less than Murphy had paid for it.

As we headed back towards our turnip patch Dad was pleased with himself. "Never know what'll happen when you're hoeing turnips, eh son?"

Prospects Of New War Is Remote

OTTAWA—After consulting various factors with the unemotional logic of the military analyst, one of the higher officers involved in Canada's defence planning estimated that the odds were 100-1 against any devastating air assault on high priority targets on the North American continent within the next 10 years.

In an interview setting out his own personal conclusions, Col. W. W. Goforth, retiring deputy director of defence research, said he felt that odds against a major war would start at 200-1 against in 1947, decline steadily until 1961-62 and would give away to a steady lessening of tension and risk after 1962.

Col. Goforth is returning to private business in Toronto after being the right hand man of Dr. O. M. Solandt, director-general of defence research, who sanctioned his statements.

"INVASION" WIRE COMING TO CANADA

TAPLOW, Buckinghamshire, England—The "pyramid," 50,000 tons of barbed wire prepared for the invasion of Europe and which lay rustling for seven years, are going to Canada.

But Victor Hardwood, who purchased the wire from the British Government and accepted the overseas offer, has had his troubles converting his investment.

He originally intended to have the wire melted into steel ingots, but Britain had no presses sufficiently powerful. When the Canadian purchaser showed up, so did innumerable shipping transport problems. Dock workers and stevedores demanded "dirt" and "bending" money for handling the wire. The obstacles now have been surmounted.

BE A HAIRDRESSER

Ladies earn more money—learn hairdressing—a profession offering ambitious women unlimited opportunities. We positively guarantee complete, thorough training under the direct supervision of nationally known instructors. Easy pay as you learn basis. Write or call for complete details and illustrated booklet.

Backache?

Backache is a friendly warning from Nature—urging you to do something about it as soon as it's the same when your shoulder is painful, or your joints become stiff. When other folks have had these complaints, many have got relief by taking Kruschen. Kruschen helps because it is a combination of several mild salts which aid sluggish organs of elimination thus helping to remove the causes of painful backache and rheumatic pains. Health improves and vigour returns. So give Kruschen a trial in your own case. Start today and for the most mouth take Kruschen regularly. Simply take a small morning dose of Kruschen in tea, coffee or hot water. At all Drugists: Size and Price.

KRUSCHEN

It's the little morning dose that does it!

RECIPES

COCOA SYRUP

1 cup cocoa
1 cup sugar
1/2 cup corn syrup
1/2 teaspoon salt
1 1/2 cups cold water
1/2 teaspoon vanilla
Combine cocoa, sugar, syrup, and salt in saucepan. Add water slowly and place over low flame, stirring until smooth; then boil gently 3 minutes, stirring constantly. Add vanilla. Turn into jar; cover tightly. Keep in refrigerator. Makes about 2 cups syrup. Serve hot or cold as sauce or use in making delicious cocoa drinks. This syrup may be made using 1 to 1 1/2 cups sugar instead of sugar and corn syrup.
To make cold drinks, use 2 tablespoons syrup to 1 cup milk.

OLEVER JUDY MOCHA FROSTING

1 cup sifted confectioners' sugar
1 egg, unbeaten
1/4 cup strong coffee
1/2 teaspoon vanilla
3 squares Baker's Unsweetened Chocolate, melted
1 tablespoon softened butter
Combine ingredients in order given, beating with rotary egg beater until blended. Place bowl in pan of cracked ice or ice water and continue beating until of right consistency to spread (about 3 minutes). Makes enough frosting to cover tops of two 9-inch cakes, top and sides of 8x8x2-inch cake, top of 13x9x2-inch cake, or small angel food cake. For all-cholesterol flavor, substitute milk for coffee.

TURKEY CONTRIBUTED

TULIP TO EUROPE

The tulip was first introduced into Europe from Turkey in the sixteenth century. After 1684 an outbreak of tulip growing in Holland, called "tulipomania," made the Dutch famous exporters of bulbs. Sometimes as much as \$5,000 was paid for a single bulb at that time. Now we can have more perfect blooms for a little work and a few cents.

China is about a third larger than continental United States. It is 1,860 miles from north to south and more than 2,000 miles east to west.

what's your score on Sleep?

YOU spend about a third of your life at it—so you might as well know something about Sleep. What's your score on the following statements—true or false?

① the earlier hours of sleep are the best—
true: Science has found the first four or five hours are most beneficial.

② sleeping on the left side strains the heart—
false: It makes no difference whether the average person sleeps on his back or either side.

③ it is better to lie absolutely still when asleep—
false: The muscles of the body are benefited by periodic changes of position.

④ you can drink postum at any hour and sleep perfectly—
true: Postum is caffeine free—contains no stimulants of any kind.

Try Postum! Make it right in the cup, with boiling water or hot milk. Costs less than a cent a serving!

Eddie started

his job
today!

THE MANAGER of the furniture factory in Eddie's town landed a big order. It meant he had to buy a lot of extra lumber, increase his payroll.

He lost no time in putting the whole thing up to the manager of his local bank. Together they worked out how much money he would need to take care of wages and other costs until he delivered the goods. Then, with the backing of his bank, he got to work on the order.

... And that's where Eddie came in. He was put on the payroll—given his first chance to learn a trade. Right now he's on his way home to tell Mom and Dad how much he likes his new job.

THIS IS ONE INSTANCE OF how Canada's 3,200 branch banks play their part in the daily life and work of Canadians.

Bairmore visitors in Lethbridge last week included Mrs. Bannan, Mrs. W. H. Chappell, Mr. and Mrs. Marshall Hamilton and Miss Dorothy Hamilton.

Frank Fleming, BA, who is taking a law course at Dalhousie, Halifax, arrived home this week to spend summer vacation with his mother, Mrs. D. F. Fleming.

A married man always has one consolation—while he isn't as smart as his wife thought he was when they were engaged, he isn't nearly as dumb as she thinks he is now.

Tune in CPON Wednesday night next May 14, at 7 p.m. for good listening. Mr. Moffatt will have the Blairmore school chorus on the air at that time in a variety of numbers.

Mrs. E. Smith, who has spent the past month in Cardston, due to the illness and death of her father, Mr. Alvin Caldwell, returned to her home in Blairmore on Saturday accompanied by her mother Mrs. Caldwell, of Cardston.

A number of young musicians and their teachers will journey to Lethbridge next week, to compete in the Festival there. The two youngest competitors in the group are Bruce Pinkney violinist and Ritchie Old pianist, both under nine.

Commencing at 8 p.m. tomorrow (Saturday) Radio Station CJOC at Lethbridge steps up its power from 1000 to 5000 watts and will observe the event with a 24-hour schedule of various features. Further information is contained in their advertisement in this issue.

Mother's Day will be observed at Central United church with two special services on Sunday. At 11 a.m. There will be a special program by the S. S. children and the sacrament of Baptism will be administered during this service. At the evening service at 7:30 o'clock the sermon will be "Our Mothers and their Homes". A choir of junior boys and girls will assist in the service. You are cordially invited to be present at these services.

Alderman Sam Fowler, well known fireboss at Elk River Collieries, sustained several fractures Wednesday morning when a runaway car in the mine struck him. He was brought to the Fernie hospital where medical and surgical aid were given and hopes are held that he is on the way to recovery.—Fernie Free Press. Alderman Fowler is brother of Mrs. Billy Evans, of Blairmore, who along with her husband made a hurried trip to Fernie on Wednesday.

A COSY HOME is cozier still when you serve Maxwell House Coffee. So delicious it satisfies completely. Expert blending assures you coffee that's famous for smooth, mellow flavor.

Born to Mr. and Mrs. Tedd Battle on Thursday, May 8, a son.

Mrs. Tony Stella arrived home from Calgary last night, Thursday, May 8.

Wanted—Horses for Fox Meat; 1c pound. Contact JOE JACOB, Hillcrest, Alta. [May 9-12]

W. L. Taylor is in town this week busy packing to convey his family to Lacombe, where he is now CPR agent.

LOST—Zipper bag, containing sweater, laundry, on road near Oliver's Dairy. Finder please leave at Graphic. Reward.

We see by a daily that Alex. Orlando was a visitor to Calgary over the week end. "Alex." reports fraternizing with Jim Smith before returning to Blairmore on Tuesday.

SCOUTS AGAIN COME THROUGH

Once again the Boy Scouts have produced results in a national effort. In response to an urgent appeal from the British Ministry of Food, British Boy Scouts are collecting jam jars of which there is an acute shortage in Britain. The 70th Coventry Cubs and Scouts, already has collected 12,000 jam jars in the drive.

PARIS FAIR EXPECTS 2,000,000 VISITORS

The thirty-sixth Paris Trade Fair which will run from May 10 to May 26 1947 will present 8,000 exhibitors to 2,000,000 visitors. Installed on its own grounds only twenty minutes away from the centre of Paris, the Fair covers about 126 acres, of which a little more than half are taken up by permanent buildings and the rest by temporary constructions erected each year. An avenue one mile long with frequent electric car service runs from one end of the park to the other. The latest novelties and designs of French industry will be shown at this year's fair. Requests for space have been so numerous that the newly built additional accommodations are already too small.

FOREST FIRE MENACE

Spring may mean seeding time, green grass, and the start of a new season to the farmers of this district; but to Alberta's highly trained Forest Rangers, spring is a season of constant watch and worry. For throughout the Province, at this time of year, the danger of forest fires is at its peak: 90% of the really destructive fires occur in April, May, late August, September and October.

Fire Prevention is a much discussed subject, but so vital is the protection of our forests, and so widespread the destruction of forest fires, it is well for all to review some of the simple rules for eliminating them. Settlers, residents and lumbermen are asked to obtain permits before setting fires to clearances. Permits may be obtained from the Municipality or the Fire Ranger. Never let fires run unattended across the land. If an outlaw fire does occur, try to put it out immediately, while it is small. Get to know your nearest Fire Ranger. He is trained to advise and help you, and is most anxious to give you his co-operation.

Keep in mind always that: green timber means money and prosperity, dead forests mean destruction and desolation. Always be careful with fire yourself, and see that your neighbor is careful. Working together, we can save many of the staggering losses always incurred by forest fires, and keep alive the priceless heritage of Alberta's forest lands.

According to the latest issue of the Alberta Gazette, Francis James Lote, of Blairmore, has been appointed a commissioner for oaths.

Search is Underway for E. B. Bottles

E. B. Bottles, believed hiding in attics, basements and garages became subject for intensive search by Blairmore citizens.

Commonly known by the full name of Empty Beer Bottles, this culprit is responsible for the present shortage of bottled brewery products, and consequently a reward of 20 cents per dozen is being offered for successful apprehension.

Housewives are taking the lead in this search for E. B. Bottles, realizing that recovery will serve a three-fold purpose. It will help consumers to get more of their favorite beverages; it will provide more space in cupboards, pantries, basements and garages, and it will put badly needed bottles back on the job and enable bottlers to continue full operation.

All citizens are urged to be on the lookout for the fugitive. His favorite haunting places around the home should be thoroughly searched, and in the event of apprehension, Deliveries Limited Agency for Alberta Brewing Industry, should be notified.

CASH REWARD WAITING

Arrangements have been made in the cities for taking "Bottles" into custody at the place he is discovered, and escorted to depot. Cash reward will be paid at scene of arrest amounting to 20 cents per dozen. Freight agents are co-operating and all rural vigilantes need to do is turn "Bottles" over to one of these agents and he will be escorted to collect. To nearest Deliveries Limited Depot at Camrose, Calgary, Blairmore, Banff, Drumheller, Medicine Hat, Lethbridge or McLennan.
